ABHIRAMI PRADEEP SUSI

Backend Software Engineer | Node.js · TypeScript · NestJS · PostgreSQL
Kerala, India | +91 81579 55281 | abhirami.pradeepsusi07@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Backend Software Engineer with 3+ years of experience building Node.js/TypeScript REST APIs, microservices and real-time features for enterprise clients, including Stellantis (Free2Move Charge) and Black & Veatch (Engig). Improved API performance by 30% through Redis caching, PostgreSQL indexing and API redesign, and optimised PostgreSQL/OpenSearch queries for location-based EV charging-station discovery. Served as part-time technical lead for a UK recruitment-technology startup. Now extending this backend foundation into AI-enabled systems through a portfolio knowledge platform in development (NestJS, PostgreSQL/pgvector, RAG).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, Python (developing)
Backend & APIs: Node.js, NestJS, Express.js, REST APIs, microservices, event-driven architecture, WebSockets, Socket.IO
Databases & Search: PostgreSQL, MongoDB, MySQL, Redis, OpenSearch; schema design, indexing, query optimisation
Cloud & DevOps: AWS (S3, SQS, CloudWatch), Azure DevOps, CI/CD, Docker, Git/GitHub
Testing & Security: Jest, Postman, unit and integration testing, JWT authentication and authorisation
Frontend: React.js, HTML, CSS

PROFESSIONAL EXPERIENCE

Software Engineer | Experion Technologies — Mar 2022 – Apr 2024

- Built and maintained Node.js/TypeScript REST APIs and microservices for enterprise products: Free2Move Charge (Stellantis, EV charging) and Engig (Black & Veatch, engineering management).
- Improved API performance by 30% through Redis caching, PostgreSQL indexing and API redesign.
- Optimised PostgreSQL and OpenSearch queries supporting location-based EV charging-station discovery.
- Implemented real-time, event-driven features with Socket.IO and Firebase to keep clients synchronised.
- Contributed to AWS CloudWatch monitoring and Azure DevOps CI/CD pipelines.
- Investigated production defects, took part in code reviews and mentored junior developers.

Associate Software Engineer | Experion Technologies — Dec 2020 – Mar 2022

- Developed Node.js/NestJS backend services and PostgreSQL-backed REST APIs for enterprise integrations, including Master Data Management APIs.
- Implemented JWT authentication and authorisation, and real-time updates through WebSocket and Firebase integrations.
- Wrote unit and integration tests with Jest and Postman, reaching 85% test coverage.
- Contributed Node.js and React.js features and improved application responsiveness by 20% through performance optimisation.

TECHNICAL PROJECTS & UPSKILLING

Part-time Technical Lead | The Recruits Group (UK recruitment-technology startup) — Feb 2023 – Mar 2024

- Worked directly with the founder on architecture and delivery of core recruitment-platform capabilities.
- Built backend modules for job posting, candidate discovery and engagement (Node.js, PostgreSQL, MongoDB) and led a two-member React frontend team.
- Took hands-on ownership of technical decisions and delivery, from requirements analysis and API design to database schema design and implementation.
- Supported deployments to DigitalOcean and Hostinger.

Career break & upskilling — Jan 2025 – Present

Maternity break in 2025, followed by a structured return to engineering through certification, AI upskilling and hands-on projects.

- Earned the **Project Management Professional (PMP)®** certification, adding formal grounding in delivery planning, risk management and stakeholder communication to technical-lead experience.
- Completed **Academy Accreditations in Generative AI Fundamentals and AI Agent Fundamentals**, building a foundation for LLM-enabled backend systems.
- **AI Enterprise Knowledge Platform** (portfolio project, in development): designing a multi-tenant, document-grounded Q&A platform with NestJS, PostgreSQL/pgvector and RAG with source citations, using AWS S3 and SQS for asynchronous document ingestion and embedding.
- **Client demo website (KHALIFA perfumes):** built a React + NestJS monorepo as a client demonstration project.
- Refreshing core JavaScript/TypeScript and backend fundamentals through structured interview preparation.

EDUCATION

Postgraduate Diploma, Mobile Application Development | Georgian College, Canada — May 2024 – Dec 2024

Master of Computer Applications (MCA) | College of Engineering, Trivandrum, India — May 2018 – May 2020

Bachelor's Degree, Computer Applications | Don Bosco College of Arts and Science, India — Jun 2015 – Apr 2018
