

ABHIRAMI PRADEEP SUSI

Backend & Full-Stack Software Engineer — Node.js | TypeScript | PostgreSQL | Redis | AWS | React.js

Kerala, India | +91 8157955281 | pradeepsusiabhirami@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Nationality: Indian | **Visa Status:** Sponsorship Required | **Availability:** Immediate — Open to Relocate (Dubai, UAE)

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 4+ years building production REST APIs, microservices and event-driven systems on Node.js, TypeScript, PostgreSQL, Redis and AWS. Delivered enterprise and SaaS platforms across EV charging, engineering management and recruitment technology, including real-time systems and geospatial search at scale. Immediately available and open to relocating to the UAE.

KEY SKILLS

Backend: Node.js, Express.js, REST APIs, Microservices, Event-Driven Architecture, WebSockets

Languages: JavaScript, TypeScript, Python, SQL

Databases: PostgreSQL, Redis, MongoDB, DynamoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch), Docker, Azure DevOps CI/CD, GitHub Actions

Frontend: React.js, HTML, CSS

Engineering Practices: System Design, API Design, Performance Optimisation, Testing (Jest, Postman)

PROFESSIONAL EXPERIENCE

Part-time Technical Lead — The Recruits Group (Remote, UK)

Feb 2024 – Mar 2025

- Engaged on a freelance, as-needed basis by an early-stage UK recruitment startup to advise on architecture and build core platform features.
- Designed and built full-stack modules of a LinkedIn-style recruitment platform (job posting, candidate discovery, engagement) using Node.js, React, PostgreSQL and MongoDB.
- Contributed across the development lifecycle — requirements, implementation and deployment support — working directly with the founder.
- Deployed application components to DigitalOcean and Hostinger infrastructure.

Software Engineer — Experion Technologies

Mar 2022 – Apr 2024

- Built scalable REST APIs and microservices in Node.js/TypeScript for high-volume enterprise workloads across Stellantis Free2Move Charge (EV charging) and Black & Veatch Engig (Engineering Management platform).
- Improved application performance by 30% through Redis caching, database indexing and API redesign — directly relevant to high-traffic backend roles.
- Built real-time, event-driven features using Socket.IO and Firebase for live data synchronisation across distributed clients.
- Optimised geospatial search (OpenSearch, PostgreSQL) for location-based EV charging station discovery.
- Set up monitoring and observability with AWS CloudWatch, reducing incident resolution time; contributed to CI/CD pipelines in Azure DevOps.
- Mentored junior developers through code review and technical guidance.

Associate Software Engineer — Experion Technologies

Dec 2020 – Mar 2022

- Designed backend APIs with Node.js and PostgreSQL for reliable data exchange across enterprise applications, including Master Data Management (MDM) APIs.
- Implemented JWT-based authentication/authorisation and WebSocket/Firebase real-time updates.
- Wrote unit and integration tests (Jest, Postman) achieving 85% test coverage.
- Built full-stack features with React.js and Node.js, improving application responsiveness by 20%.

EDUCATION

Postgraduate Diploma, Mobile Application Development — Georgian College, Canada

May 2024 – Dec 2024

Master of Computer Applications (MCA) — College of Engineering, Trivandrum

May 2018 – May 2020

Bachelor's Degree, Computer Application — Don Bosco College of Arts and Science, India

Jun 2015 – Apr 2018
